Dear Chloe,

Enclosed is the first set of occasional papers written and designed at the Center as companions to our "electronic notebook" video series. In addition to Brice's major work there are shorter pieces by others on the staff ranging from reflection on public television and values to descriptions of innovative electronic circuit designs.

I would very much like to have your evaluation of this material and (if you like the idea) how this information might be more widely circulated. I hope to be coming east in May to show the "electronic notebook" and would enjoy seeing you again. If you get a chance please drop me a line or call.

Warmest regards,

Paul Kaufman,
Executive Director
